Dear Valued Customer,

Pioltello, 2022/01/20

**REF: DIRECTIVE 2011/65/UE "RoHS".**

With reference to the updating of the legislation regarding the restriction of use of some hazardous substances in electrical and electronic equipment we certify that all items supplied by VITAL S.p.A. comply with Directive 2011/65/EU also referred to as "Directive RoHS".

We also inform You that all our articles submitted to a treatment of galvanization are identified with an item code (shown on shipping documents, invoices, packing lists and order confirmations and / or on the packaging in which they are contained) whose suffix "**B3**" ensures that the surface coating underwent a proper process in accordance with the Directive stated here above which ensures the absence of hexavalent chromium (Cr6) replaced by trivalent chromium (Cr3).

In the same documents mentioned above the inscription "**ZB TRIV (trivalent white zinc)**", "**ZG TRIV (trivalent yellow zinc)**" can also be present.

The packaging of these products can sometimes show, in addition to the item code quoted above, the marking "CR3" or "CR6FREE" which is an additional confirmation of compliance of the products with Directive 2011/65/EU "RoHS".

We remain at Your disposal for any further information,

Best Regards.

**VITAL S.p.A.**
